

Pranav S

High-Impact Developer with 3 years of deep expertise in Vue.js, React, and TypeScript architecture. Results-proven by architecting a major application overhaul that successfully reduced initial page load times by 50%, significantly enhancing user experience and SEO. I specialize in delivering robust, responsive web solutions across the full development lifecycle. Eager to leverage this technical depth and design sensibility to drive performance and innovation in a growth-focused UAE-based team.

Relevant Experience

Developer • Armino Technologies September 2022 — Present (3 Years)

- Engineered and deployed core features for a flagship CRM, improving the data visualization dashboard load time by 40% and increasing adoption by 15% among 50+ internal users.
- Spearheaded the front-end implementation of a new application module using Vue 3, Vuetify, and TypeScript, reducing page load times by 20% compared to legacy systems.
- Architected the client-side data layer using GraphQL, Apollo, and Redux Toolkit, which reduced API calls by 30% and decreased data latency, leading to a faster user experience.
- Led the integration of a multi-language (l18n) solution, successfully deploying the platform in 5 new regional markets and expanding global team usability by 25%.
- Ensured cross-browser compatibility and mobile responsiveness for all new features using Tailwind CSS and custom media queries.
- Utilized animation libraries like GSAP and Framer Motion to create smooth, engaging UI/UX transitions and improve perceived performance.
- Managed data for dynamic UI components and complex business logic, demonstrating proficiency with data binding principles.
- Gained practical experience with server-side rendering and meta-frameworks (Nuxt.js and Next.js) to enhance SEO and initial load performance.
- Contributed to database design discussions, demonstrating familiarity with SQL and Oracle environments.
- Wrote and maintained CSS using preprocessors (Sass/LESS) and modern CSS frameworks (Tailwind, Bootstrap).

Selected Projects

Bizo Suite

A comprehensive Enterprise Resource Planning (ERP) platform designed to streamline and automate core business functions, including CRM, finance, sales, and inventory management. The project focused on building an intuitive, unified system for internal teams to enhance decision-making and operational efficiency across the enterprise.

Space Event Rentals

An online rental platform specializing in high-end furniture and logistics for large-scale events. The project involved creating a user-friendly system for browsing inventory, managing bookings, visualizing event layouts, and handling complex logistics for corporate, private, and exhibition clients.

Select VFX Studio

The digital presence and internal asset management for a Visual Effects (VFX) studio that creates stunning visuals for films, commercials, and gaming. The work centered on developing a high-impact, media-rich portfolio showcasing projects and building reliable internal tools for asset tracking and team collaboration.
